

HYGIENE THAT EMPOWERS

x Hindware

“Today, we are here to address an issue. An issue which is otherwise a basic amenity in everyone’s house. Several Swach Bharat Abhigyan slogans later, we are here to complete the incomplete by designing a prototype that can not only be one of its own, but also be used to transition existing toilets into something more.

The prototype is designed with an additional bamboo entrance followed by a separated ceiling that allows for natural ventilation. The bamboo provides privacy, as well as helps in creating an inner green sanctum.

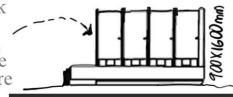

The washroom for strange reasons unknown is a safe space, and so it should be. The design elements used here help engage the user in a conversation that we hope is both sufficient, as well as a little over the top.”

01

Cubicle system with back wall and half length of side walls made of brick, and the rest leading to the door made of cement fibre boards. Tile drop of 100mm to be adopted.

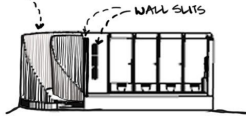

02

Addition of a curved ramp to create an entrance and make it disable friendly. Simultaneously, creates a sweet spot for landscaping accessible from within, partly visible from the outside.

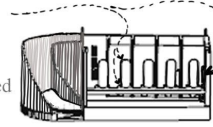

03

Bamboo added to provide privacy as well as add to the aesthetics while being low cost and easy to fix. Inner walls with slits that let light play through the interior. Cubicle doors to be made by reclaiming old discarded wooden doors.

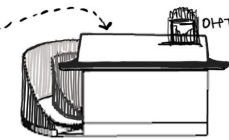

04

Hindware mini oval countertop basin used along with mirrors, handwash dispensers and pad dispenser added to the inner walls. Level difference maintained to keep areas dry and wet.

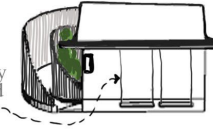

05

Roof slab to rest on supports that provide for light and ventilation. Slab with overhang to provide shade if necessary. Flat roof to contain OHT cocealed by bamboo and solar panels to the back.

06

Creation and addition of swings using left over reclaimed wood pieces that are carefully reinforced and attached to the overhang of the roof.

Special Dispenser

To help normalise menstrual cycle as well as open a conversation on it, sanitary napkins and menstrual cups are provided with instructions illustrated in national and local languages. Apart from handwash and soap dispenser, we believe this is just as important to introduce in schools.

Towel Board

To convey the importance of good touch and bad touch, we have introduced a board to spread awareness on the same. This board is to be placed in proximity to the newspaper stand at the spillout,

Alert button

An alert button which one would be able to press in case of emergency- the message is to be transferred to the nearest helpline centre.
